

- Custom design
- Modular skidded
- Multitude of Sizes to fit your needs.
- Flexible to accommodate requirements.
- Custom Styles – Commercial, Residential, Rural, etc.

- Northland Industrial Specialties, LLC provides custom built modular structures to fit your individual and specific design parameters. From a small cubical style module to a larger 16'x80' module that can be expanded easily for future growth. With a pre-tested plug and play design for faster install and start-up, NIS is confident we can produce an innovative and quality product to serve your needs and because of our custom build flexibility, we can accommodate styles that work within Industrial, commercial, and/or residential areas.
- Our 25-years of experience in construction of various skidded and mobile products in the Energy, Industrial, and Municipal Industries allow us the flexibility to engineer a product for your specific requirements for Battery Storage. We are a Rockwell Automation OEM Partner with vast experience with PLC Automation, Integration, and mechanical work for many different skidded Modules that we have constructed. We specialize in understanding the relationship of mechanical and automation processes to make a seamless operation.
- Projects
 - 1 MW Parallel Quad Diesel Powered Generator System including Automated Switchgear and Power monitoring.
 - Combined 2000 HP Fluid Handling Transfer System with Integrated Control Room and PLC with Variable Frequency Drives on Skidded Facility
 - Motor/Power Control Centers for Multiple uses
